# Corner 4x4s for corner irrigation systems

THE STRENGTH AND TRACTION YOU NEED TO KEEP YOUR CORNER SYSTEM RUNNING SMOOTHLY

Improve the performance of a new or current corner system by adding the Corner 4x4 drive system, four wheels that work together to provide better traction, as well as more even weight distribution of the swing arm tower.

The Corner 4x4's strength, durability and unparalleled traction provides better floatation – and greatly decreases the chance of getting stuck in the mud, which means less downtime and more effective watering.

Available exclusively from Zimmatic®, Corner 4x4s will work with any new or old Zimmatic or Valley® corner machine – including the MAXfield Custom Corner, the newest system to provide exceptional corner irrigation.\*

Contact your local Zimmatic dealer today about adding Corner 4x4s to a new or current corner system – or visit [www.zimmatic.com](http://www.zimmatic.com) for more information.
